Education

M S Ramaiah Institute of Technology — Bengaluru, KA
Master of Technology in Computer Science and Engineering — *October 2019 – July 2022*

REVA University — Bengaluru, KA
Bachelor of Technology in Computer Science and Engineering — *August 2014 – August 2018*

Experience

Test Engineer — Sept 2025 – Present
InTeleCyber Services Pvt Ltd — *Bengaluru, KA*

- Conducted comprehensive security audits and compliance assessments for IP Routers, Wi-Fi CPEs, ONTs, Firewalls, and IoT/network devices in accordance with NCCS–ITSAR standards.
- Designed and executed detailed security test plans and test cases to evaluate functionality, performance, robustness, and security of network and IoT devices, contributing to the laboratory's accreditation for ITSAR-compliant testing.
- Identified and successfully validated a Remote Code Execution (RCE) vulnerability in a customer ERP web application, demonstrating security impact and supporting remediation efforts.
- Discovered, analyzed, and reported critical vulnerabilities across web applications, APIs, and embedded systems using Burp Suite, Nessus, Nmap, Wireshark, and OWASP ZAP.
- Performed fuzz testing on network and embedded devices based on defined security requirements to identify robustness issues, unexpected behavior, and potential vulnerabilities.

VAPT Intern — Oct 2022 – Dec 2024
Velankani Electronics Pvt Ltd — *Bengaluru, KA*

- Conducted vulnerability assessments and penetration testing of web applications, APIs, and network infrastructure, covering authentication, authorization, input validation, exposed services, and insecure configurations.
- Performed reconnaissance, enumeration, vulnerability discovery, and exploitation using Nmap, Burp Suite, Wireshark, Gobuster, and other security testing tools.
- Analyzed application behavior and network traffic, performed wireless security assessments, and documented findings with reproducible proof-of-concept steps, technical impact, and remediation recommendations.

Unity 3D Intern — Sept 2018 – Jan 2019
Thinqbot Technologies Pvt. Ltd. — *Bengaluru, KA*

- Developed and published a Unity 3D application using C# for visualization and control of electrical appliances in a 3D environment.

Projects

CTF Write-Ups | *GitBook* — Dec 2023 – Present

- Published security write-ups for TryHackMe and Hack The Box challenges covering reconnaissance, enumeration, exploitation, privilege escalation, and post-exploitation, with reproducible PoCs, methodologies, and tooling.

Patent Landscape Analysis Using NLP | *Python* — March 2020 – March 2022

- Developed Python scripts for bulk patent processing, XML-to-CSV parsing, bibliographical analysis, and NLP-based visualization of patent trends.

Advanced ATM Authentication Using Fingerprint and OTP | *Arduino, C* — Dec 2017 – May 2018

- Developed a prototype ATM authentication system integrating RFID, fingerprint, OTP, GSM, and Arduino-based control.

Certifications

Certified Ethical Hacker (CEH) — January 2026
eLearnSecurity Junior Penetration Tester (eJPT) — January 2026
Google Cybersecurity Professional Certificate — June 2025
TCM Academy: Practical Ethical Hacking - The Complete Course — March 2024
TryHackMe: Red Teamer of the Month — June 2023

Technical Skills

Security Testing: VAPT, Web Application Security, API Security, Network Security, Vulnerability Assessment, Penetration Testing, Exploitation, Fuzz Testing
Security Standards: NCCS–ITSAR, OWASP
Security Tools: Burp Suite, Nmap, Nessus, Wireshark, OWASP ZAP, Gobuster, Dirbuster
Programming: Python, C/C++, C#, SQL, JavaScript, HTML
Developer Tools: Git, Docker, VS Code, Visual Studio
